

Student Testimonial

Pathan, India

International Foundation Year
UEL International Study Centre

is amazing, it is very enjoyable. So, I enjoy studying here and socialising with some new friends and classmates from different cultures and countries. So, it is a great experience to study here.

What made you choose to study at UEL?

My latest study was in industrial training in India and so I researched online and I found that at UEL there was a course of interest in the field of Engineering. So, I applied to some universities, and I was got accepted to UEL with the course of Engineering Management with a Foundation year so that's why I applied for this course in this university.

How has your experience been so far?

It's a really nice experience. In the beginning, there were some trouble because the place where I live is quite far from here but now I'm used to it and I enjoy the journey of underground trains and the structure of this university

What's it like on campus?

There are some societies like the Student Union and some religious societies for every culture and country. The campus is amazing, and I have made lots of new friends from different countries and also some new friends from India so it's a really amazing experience to socialise with the people here; they are very friendly and supportive.

How have you found your course?

It's Engineering Management, so there are three terms in the first (Foundation) year. Currently, I am studying the third term. In the first term, there were two modules called EAP (English for Academic Purposes) and the other was Research & Study Skills.

During, the second term, there were two different modules, which were more about learning about Engineering materials. We found out a lot of different things about materials which are related to the Engineering industry. In this term currently, we are learning Engineering mechanics.

What has the teaching been like?

The tutors are very qualified and friendly. They are very supportive, so I find their teaching amazing. In the beginning, there were some complicated scheduling of our timetable but now they have made it flexible for us, so I'm impressed by the method of teaching and management in my course.

Have you used the career zone?

I am receiving emails regularly from the Career Zone. I think there are lots of opportunities in the UK, as it's very industrialised as a country. I will have a meeting soon with the department Career Zone in the East Building, and then let's see what happens.

What are your plans for the future?

After I successfully finish my Bachelor's, I am planning to do my Master's also at the same university because it is an amazing reputed university so hopefully I will complete my master's here at UEL too, that is my aim.
