

Student Testimonial

Abdulkareem Saudi Arabia

General English

Malvern House Brighton

What made you choose Malvern House to study?

I came to Malvern House to improve my English language because in my job, as a programmer for a telephone company in Saudi Arabia, I use English language a lot.

I tried to find a school with high ratings and finally I found Malvern House. They have really good teachers and a good Director to manage all the courses in the school and that's why I chose here.

What was your aim when coming to study English here?

I need to improve my general language. I have some issues with understanding what people are talking about in movies, or when having a conversation in my company. Perhaps in the future I will do

my master's degree too.

What do you like about Brighton?

I heard Brighton has a lot of different people of all different nationalities. It interested me to know about different cultures and that's why I chose Brighton.

How is your course?

The teachers have very good experience and skills in teaching. They give us many different activities in class, like doing a game with a partner or a discussion with classmates. Sometimes we also do presentations. They answer any questions I have, and they are very kind.

Have you made some new friends?

I have good relationships with other students of different nationalities. Sometimes we visit different places in Brighton together or play football.
